

PURPOSE LETTER

SOFT TECH HUB

YOUR OWN OPPORTUNITY...

SOFT TECH HUB is a Programmers group moving ahead with a quite slogan Create Your Own Opportunity.

It means a single agenda to follow your dreams. As I thought a real programmer exists only due to his coding skills and it is always said that a project never ends.

So, the never-ending project may

be the best project of our if we make it more and informative and more productive. Yes, it is possible to make it the best and best part is that we all have the ability to make it more informative. To

make it happen we are here. This purpose written for the same reason. Information Hub is a practice to make it happen if all the programmers on this globe start writing their codes and sharing them there should be no need to write new codes. We will have as much as code which can fulfil our

every development requirement just editing them. But it's a biggest curse to our generation to our society our civilization that we are not information sharing but we are information hiding peoples and this is making the lack of information. When I was in college I first wrote a school management project in .Net and share that to the whole group at that time.

SOFT TECH HUB IS A
THOUGHT TO PROVIDE THE
INFORMATION FREE OF COST.
TODAY ALL THE STUDENTS
FROM ANY SIDE OF THIS
GLOBE JUST SEEKING FOR
MORE AND MORE
INFORMATION AND WE ARE
HERE FOR THAT.

Because I feel the lack of information today my projects and open codes are helping Others to get their task done easily. It is making the young programmers easy to read

understand and think something different. Finally, I would like to say that for the betterment of the IT and its advancement come and join the SOFT TECH HUB and share your ideas, codes, Designs whatever you have for the next programmers, for the Tech Lovers.

SOMETHING MORE...

Information Hub is a way to communicate with you all. we are working hard and our best to serve you all the best of IT. It is nothing until all the students and enthusiast come together to make it the actual hub. So, it is a kind request to from our team to all my visitors and supporters. If you have the idea to make this globe more Informative, easier write your ideas and send to us we promise to publish your ideas on our sites. I am thanking you for visiting and reading our purpose letter. Kindly Send your ideas technical projects to us.
